

ProstaStream Reviews - Safe Prostate Support or Cheap Ingredients?

Hello my name is Peter, I brought some important information involving the ProstaStream. If it is really good, if it is worth buying it, I hope you like it. :)

ProstaStream is a nutritional supplement that can purportedly shrink a prostate in weeks as part of a 15-second male bedtime ritual.

By taking two capsules of [ProstaStream](#) daily, you may be able to enjoy a natural remedy for an enlarged prostate (benign prostatic hyperplasia, or BPH).

Keep reading to find out how ProstaStream works, what the supplement does, and why you should take it today in our review.

What is ProstaStream?

[ProstaStream is a dietary supplement marketed to men with an enlarged prostate.](#)

Each capsule of ProstaStream contains a blend of vitamins, minerals, plant extracts, and nutrients to support normal prostate size. By taking one serving (two capsules) of ProstaStream each day, you can purportedly support healthy prostate size.

50% of men over 50 have an enlarged prostate. Also known as benign prostatic hyperplasia (BPH), an enlarged prostate can lead to difficult urination and other symptoms.

As the makers of ProstaStream explain, ProstaStream is designed specifically for those with BPH and an enlarged prostate:

“ProstaStream is for anyone who suffers from BPH or an enlarged prostate.”

Whether you can't empty your bladder properly or you feel the need to urinate more often, ProstaStream may be able to help.

ProstaStream is distributed by an Englewood, Colorado-based nutritional supplement company.

ProstaStream Benefits

According to the official website, ProstaStream can offer all of the following benefits:

Never have to worry about urinary tract infections, painful bladder stones, or aggressive kidney diseases ever again

Never struggle to push out a few drops of pee

Avoid worrying about maintaining a steady stream of urine

Wake up refreshed and full of energy

Pee like a teenager

Enjoy the strength and libido of a young man and enjoy a restful sleep

How Does ProstaStream Work?

ProstaStream works as part of a 15-second male bedtime ritual that “shrinks your prostate in just weeks,” according to the official website.

If you have an enlarged prostate or benign prostatic hyperplasia, then ProstaStream aims to help by shrinking your prostate, helping to reduce symptoms of the condition.

Common symptoms of an enlarged prostate include difficult urination, difficulty emptying the bladder, struggling to start or stop urination, sexual dysfunction, and getting up in the middle of the night to pee, among other symptoms.

Each serving of ProstaStream contains a blend of natural ingredients to reduce the size of your prostate. Those ingredients work in different ways to support prostate health. Some ingredients support prostate size by flooding your body with antioxidants, helping to target inflammation. Others specifically target prostate size using special herbs and plants prized for centuries in traditional medicine as natural prostate health solutions.

[Hurry and purchase ProstaStream now before it's too late!](#)

An Enlarged Prostate “Has Nothing to Do with Age”

According to the makers of ProstaStream, prostate size is unrelated to age.

An enlarged prostate is not an inevitable part of aging, and you don't have to deal with BPH symptoms simply because of your age.

In fact, the makers of ProstaStream insist BPH “has nothing to do with age” and that “the real cause of prostate enlargement has everything to do with your body mistaking your hormones for a lethal infection...”

Because your body mistakenly treats the issue as a lethal infection, you experience an enlarged prostate and the resulting symptoms of BPH.

In fact, that same natural reaction within your body also “triggers a massive inflammation” that causes erectile dysfunction and hair loss – two of the most common concerns for older men, along with BPH.

ProstaStream claims to help by targeting the root cause of an enlarged prostate using a traditional method sourced from Japan. By targeting the root of the condition, [you can boost your vitality, sex drive, and bladder control](#) and shrink your prostate to a normal size.

How the 15-Second “Japanese Honor” Method Works

The makers of ProstaStream developed the supplement based on a 15-second “Japanese Honor” method.

According to the makers of ProstaStream, that method traces its roots back to the traditional samurai of Japan, who used the method to shrink their prostate.

Some of the ingredients in ProstaStream trace their roots to traditional Japanese medicine, where they’ve been used for centuries as a natural way to shrink a prostate.

Many of the ingredients in ProstaStream grow naturally in Japan. Frank Neal, who helped to create ProstaStream, conducted research to find the cure for prostate problems. His research led him to a series of natural ingredients in Japan. Many of those ingredients ended up in the ProstaStream formula.

Today, modern studies show these same traditional science ingredients could help with an enlarged prostate. Backed by centuries of use in traditional medicine, the ingredients are

increasingly showing their value in double-blind, placebo-controlled clinical trials published in peer-reviewed medical journals.

ProstaStream Versus Prostate Drugs

If you talk to your doctor about prostate problems or BPH, then your doctor may prescribe prostate drugs or other medicine.

However, the makers of ProstaStream advise against these solutions. The official ProstaStream website describes prostate drugs as “useless,” claiming they’re “chemical-filled medicine so they [Big Pharma] can stay rich.”

Prostate drugs are a problem because they don’t tackle the root cause of prostate problems. Instead, they tackle the symptoms of an enlarged prostate – like difficult urination. Because they tackle the symptoms, they keep you reliant on prostate medication. You never shrink your enlarged prostate, and you’re forced to continue taking this medication – and keeping big pharmaceutical companies wealthy – for the rest of your life.

Here's why Frank Neal, who created ProstaStream, believes people who take doctor-prescribed prostate medication are suckers:

“The Big Pharma conglomerates have a cash-prize on the head of each able-bodied man in America. Each man who falls prey to this seemingly harmless urinary problem risk not only public humiliation, emasculation, physical discomfort, life-threatening kidney failure...But also bankruptcy! Provenge costs \$93,000...Zytiga costs about \$5,000 a month. Sanofi’s Jevtana costs about \$8,000 every three weeks.”

Instead of taking these high-priced solutions from big pharma, Frank recommends using his supplement instead.

As proof Big Pharma is threatened by his invention, Frank claims he is facing over a dozen lawsuits from pharmaceutical companies. He also claims his presentation has been removed from the internet twice because of Big Pharma.

In fact, Frank claims you don’t need to take his formula forever to see results. Most prostate drugs require regular usage for life. ProstaStream, on the other hand, requires just 1, 3, or 6 bottles to provide results “well into old age.” By taking ProstaStream for just 1 to 6 months, you could relieve BPH symptoms for life, according to the official website. Frank and his team strongly recommend the 6 bottle package to make sure you get the full benefits of the formula for as long as possible.

ProstaStream Ingredients

ProstaStream contains a blend of natural ingredients linked to prostate health and prostate size.

The full list of ingredients in ProstaStream includes:

Plant Sterol Complex: Plant sterol complex is the largest ingredient in ProstaStream, and there are 300mg of plant sterol complex in each serving of ProstaStream. Plant sterols are natural compounds found in plants. Studies show they may be able to safely lower cholesterol levels. In fact, plant sterols are chemically similar to cholesterol but are made in plants – not humans. Certain natural ingredients, including vegetable oils, nuts, and seeds, have high levels of plant sterols. Studies show they can help support cardiovascular health. Studies also show plant sterols are rich with beta sitosterol, which is used to manage BPH.

Saw Palmetto: Saw palmetto is native to the southeastern United States, and it was traditionally used to make medicine for a variety of conditions. Today, saw palmetto is best-known for its use in prostate supplements, and some studies show saw palmetto could help support normal prostate size. As the second largest ingredient in ProstaStream, saw palmetto could help with BPH in multiple ways.

Pygeum Africanum: Pygeum Africanum is a popular herbal remedy for BPH. It's been used in traditional medicine in central and southern Africa for centuries. Today, modern studies show Pygeum Africanum contains natural chemicals linked to inflammation throughout the body, with some studies specifically connecting Pygeum Africanum to normal prostate size.

Vitamins: ProstaStream contains two vitamins, including vitamin E and vitamin B6. Each serving contains 87% of your daily value of vitamin E and 196% of your daily value of vitamin B6. Vitamin E is one of nature's best antioxidants, and studies have linked it with healthy inflammation throughout the body. Vitamin B6, meanwhile, is crucial for energy, and it supports energy production at the cellular level.

Minerals: ProstaStream contains multiple minerals linked to prostate health, including zinc, selenium, and copper. Each serving of ProstaStream contains 22% of your daily value of copper, 91% of your daily value of zinc, and 255% of your daily value of selenium. Studies show men who are deficient in these three minerals may experience certain health effects. By supplementing your dietary sources of these three minerals, ProstaStream could help with prostate size and other conditions.

Red Raspberry: ProstaStream contains a 50mg serving of red raspberry fruit extract. Red raspberry fruit extract is rich with vitamin C, which can support healthy inflammation throughout the body.

Annona Muricata Leaf: Also known as soursop or graviola, Annona muricata leaf has a natural sweet and sour taste. Some studies have shown the plant extract has natural antioxidant effects because of its high levels of flavonoids and acetogenins.

Green Tea Leaf: Green tea leaf extract, like red raspberry, has been added to ProstaStream for its antioxidant effects. Studies show green tea leaf could support antioxidant effects throughout the body via natural chemicals like EGCG. Although few studies have specifically examined the effects of green tea leaf on prostate health, multiple studies have shown green tea affects inflammation throughout the body.

Cat's Claw: Cat's claw has been used for centuries in traditional medicine. Cat's claw is a woody vine growing natively throughout the Amazon rainforest and parts of South America and Central America. Today, a growing number of nutritional supplements use cat's claw for its effects on inflammation and overall health and wellness.

Mushroom Extracts: ProstaStream has three active mushroom extracts, including 10mg each of maitake, reishi, and shiitake mushroom extract. Mushroom extracts are rich with beta glucans

linked to health effects, which is one reason why they've been so popular in traditional medicine for centuries.

Amino Acids: ProstaStream contains three amino acids or amino acid precursors, including L-glutamic acid, L-alanine, and L-glycine. These three amino acids could help with energy. Although most studies have not examined the effects of amino acids on prostate health, it's possible amino acids could support overall health in various ways.

Other Plants & Herbs: ProstaStream contains a collection of dozens of plants, herbs, and other natural extracts linked to inflammation or general prostate health. Other active ingredients in ProstaStream include quercetin, juniper, uva ursi, buchu, pumpkin seed, burdock, cayenne pepper, tomato, and broccoli, among others.

How the 15-Second “Japanese Honor” Method Works

How to Use ProstaStream

Frank Neal and his team recommend taking two capsules of ProstaStream per day via the following instructions:

Take one capsule in the morning, 10 to 15 minutes before breakfast

Take a second capsule before lunch or dinner

Scientific Evidence for ProstaStream

The makers of ProstaStream cite five studies on the supplement's references page as proof the product works. Additionally, many of the ingredients in ProstaStream are backed by years of scientific evidence and decades of peer-reviewed research. Although the ProstaStream formula itself has not completed trials, the individual ingredients within the formula have been studied. We'll review all of this evidence below.

Plant sterol complex is the largest ingredient in ProstaStream. Commonly used for cardiovascular health and cholesterol, plant sterol complex is also popular for managing BPH. According to [a 1998 study](#), the beta sitosterol in plant sterol complex “activates the sphingomyelin cycle and induces apoptosis” in human prostate cancer cells, which could help with prostate cancer. A [separate study](#) found that same beta sitosterol could help with benign prostatic hyperplasia.

Soursop, also known as **Annona muricata** or **graviola**, has been linked to prostate health in multiple studies. In a [2015 study](#), for example, researchers found soursop had synergistic interactions

within its flavonoids and other natural antioxidants, and that these synergistic interactions could “confer protection against prostate cancer.” In other words, the natural antioxidants within *Annona muricata* could help with prostate cancer, according to some studies.

Pygeum Africanum, the third largest ingredient in ProstaStream, could help with benign prostatic hyperplasia, according to some small studies. A [1998 study](#) found Pygeum Africanum was one of several popular herbal remedies for BPH. Researchers praised the ingredient for being well-tolerated and cheaper than many other solutions. A [similar study from 2002](#) reviewed 18 trials involving 1,562 men who took Pygeum Africanum or a placebo. Researchers found men taking Pygeum Africanum were twice as likely to report an improvement in overall symptoms compared to men taking a placebo.

Overall, ProstaStream contains a blend of natural ingredients linked to prostate health and overall inflammation. The bulk of the formula consists of three active ingredients, including saw palmetto, plant sterol complex, and Pygeum Africanum, all of which are backed by clinical trials showing they help with prostate health.

ProstaStream Supplement

Facts Label

Frank Neal and the ProstaStream team publish the full list of ProstaStream ingredients upfront, making it easy to see what's inside the supplement and compare it to other prostate formulas sold online today.

Here are all of the ingredients and individual dosages in ProstaStream:

300mg of plant sterol complex

200mg of saw palmetto berries

142mg of a proprietary blend with quercetin dihydrate, juniper berry, uva ursi leaf, buchu leaf, L-glutamic acid, L-alanine, L-glycine, calcium D-glucarate, pumpkin seed, burdock root, cayenne pepper fruit, goldenseal root, gravel root, and marshmallow root

100mg of Pygeum Africanum bark

50mg of red raspberry

50mg of Annona muricata

50mg of green tea

30mg of cat's claw bark

20mg of broccoli leaf

10mg of tomato

20mg of stinging nettle

10mg of maitake mushroom

10mg of reishi mushroom

10mg of shiitake mushroom

13mg of vitamin E (87% DV)

3.33mg of vitamin B6 (196% DV)

10mg of zinc (91% DV)

140mcg of selenium (255% DV)

0.2mg of copper (22% DV)

Other (inactive) ingredients, including rice flour, gelatin (from bovine sources), silicon dioxide, and vegetable magnesium stearate

ProstaStream Reviews: What Do Customers Say?

ProstaStream is backed by positive reviews online, and most customers agree ProstaStream works as advertised to shrink the prostate and [eliminate all symptoms of BPH](#).

Here are some of the reviews left by men on the official ProstaStream website:

One customer, Jason S. from Boston, claims he used to schedule his day around bathroom visits and had to avoid spicy foods, alcohol, and other triggers barbecue they would make things worse. After taking ProstaStream, he has avoided these symptoms and his sex life is better than ever.

Frank Neal, who helped to create the formula, claims the supplement leads to near-permanent relief of all prostate problems even when taken for just a few months. Men who take a 1, 3, or 6 month supply of ProstaStream may never need to worry about prostate problems against, according to the official website.

Other reviewers claim to have reduced BPH symptoms and stopped urinating so frequently thanks to the supplement. One man claims he no longer wakes up at night to urinate, for example, and pees just 5 or 6 times per day in total.

Overall, reviewers agree ProstaStream works as advertised to shrink a prostate, relieve BPH symptoms, and help them feel normal again.

Option	Supply	Per Bottle Price	Total Price (Original)	Total Price (Discounted)

ProstaStream Pricing

ProstaStream is priced at \$69 per bottle, although the price drops as low as \$49 per bottle when ordering multiple units.

Here's how pricing works when ordering ProstaStream online today:

1 Bottle: \$69 + Free US Shipping

3 Bottles: \$177 (\$59 Per Bottle) + Free US Shipping

6 Bottles: \$294 (\$49 Per Bottle) + Free US Shipping

[\(Special Discount\) Purchase ProstaStream For The Lowest Prices Here!!](#)

To justify pricing, Frank claims his supplement is “not about the money” for him; instead, he deliberately priced the formula low out of the goodness of his heart to help other families avoid the struggles his family faced.

ProstaStream Refund Policy

ProstaStream has a 100% satisfaction guarantee, and you can request a complete refund for up to 60 days after ordering ProstaStream. Contact the manufacturer to initiate the refund process if you're unsatisfied in any way.

About ProstaStream

ProstaStream is a prostate health supplement available exclusively through ProstaStream.com.

The supplement was created by a man named Frank Neal. Frank describes himself as “the most hated man in Big Pharma’s board meetings” because he developed a supplement that threatens the multibillion dollar big pharmaceutical prostate drug industry.

Frank was motivated to create ProstaStream after watching his brother, a former SWAT officer, struggle with the effects of BPH. Frank describes the process as “gut wrenching.” He doesn’t want other families to go what he and his brother did, so he created ProstaStream – in partnership with a man named Alan – to help other men treat the condition.

According to the official website, ProstaStream has been used by 17,856 men all across the United States, which would make it one of the bestselling prostate supplements available online today.

You can contact Frank Neal and the ProstaStream customer service team via the following:

Online Form: <https://prostastream.com/help/contact-us.php>

ProstaStream is manufactured in the United States in an FDA-registered facility meeting strict conditions.

Final Word

ProstaStream is a prostate health supplement created by Frank Neal and a team of natural supplement producers.

Just take two capsules of ProstaStream daily, and you can purportedly enjoy a 15-second ritual linked to smaller prostate size. That ritual relieves prostate problems long-term – even if you stop taking it after a few months.
